**WITH USER**

# OVERVIEW

In order to support the future development of the crypto currency, we decided to announce a new idea. The BURN token achieves various missions, and the value of the token will rise by burning. In addition to the missions described in this white paper, we are looking for ideas from you and plan to increase it in the future.

The project we do is just buy Bitcoin with the profits gathered to purchase the token, that's it. Some think that it is absurd, but if the value of Bitcoin is not improved now in the crypto currency, the value of alto coin is hard to raise.

I think that raising the value of Bitcoin will improve the value of the entire crypto currency and will benefit you. So I decided to start a project to simply buy Bitcoin.

Many kinds of crypto currency exist and the important money of you who is dispersed will be able to buy Bitcoin with a larger amount by improving the value of the BURN token.

I think that it is a project like an investment fund.

Currently, there are many things that you don't know if the project you are announcing is advanced or projects that are said to be fraud. Simply, if you burn with the feeling like a game, the value of the token rises and you expect this project leading to the value improvement of Bitcoin, your participation will contribute to the value improvement of the entire crypto currency. Let's see. I am looking forward to participate.

I will explain a few.

The timing and amount of purchasing Bitcoin is decided by the project team.

After clearing the mission, it burns within a few days.

You may be burn in the mood of a project member.

Also, participating in this project will feel like playing a game.

However, if you keep on running the burn, there is a concern that the time will come when it will end someday.

So I decided to set up special rules. It increases by 333,333 tokens per second, and it publishes additional once a month. It's because I thought that the RPG without damage was not interesting and that it was incomplete as a project aiming for value improvement in a game that end someday.

If 333,333 tokens increase per second, it will be about 863,999,136,000 tokens per month.

This is only 0.0086% of the amount to be issued at the beginning and 0.1% even after one year.

I think that it is not a significant influence, but I'm also looking forward to a lot of strategies based on this.

To add in the future

In the future of crypto currency, we have great expectations.

Crypto currency and Blockchain give us hope.

From now on it will further penetrate our lives and give us a rich future.

This project aims to appreciate and contribute to its wonderful  
technology.

People who profit from the crypto currency can use the profit,  
technology, interests and new services it will provide it.

I strongly hope that such a chain will come from this BURN TOKEN.
